OEM Speaker Removal

- Once your Door panel has been removed, store it in a safe location until it is time to reinstall it, to avoid any type of accidental damage.

COMING SOON

- Now that the door panel is out of the way, we can remove the OEM speaker.

COMING SOON

- Start by disconnecting the speaker wire connector by depressing the pressure tab to release the locking clip. Then, slide the connector out from the speaker basket.

COMING SOON

OEM Speaker Removal

- With the speaker wires removed, you can now remove the 10mm bolts attaching your speakers to the door. For the front door you should have 4-10mm bolts, and the rear will have 3-10mm bolts.

COMING SOON

- Finally remove the speaker from the door, you may need to use a bojo tool or plastic pry tool to release the speaker from the door.

COMING SOON

TC1-118 Door Speaker Install

- To install your speaker, place the speaker into the OEM speaker cut out, and secure it with the previously removed 10mm bolts.

Tech Tip: With your speaker removed, now is a great time to apply sound dampening material around your speaker.

- Next reconnect the OEM speaker wire connector into the correct receptacle on the speaker's basket.

- Now your new speaker is officially installed, and you can reinstall your door panel. Once the door panel is reinstalled. Be sure to test all your window, locks, and door handle functionality.
